Barr's 'Pure' Grasses for Sowing in September (<i>See below</i>).		

BARR'S 'PURE' GRASS SEEDS

Produce Beautiful Lawns, Tennis and Cricket Grounds, Public Parks, &c.

Renovate Lawns, &c., in September, after the wear and tear of Summer. For renovating 20 to 30 lbs. of Grass Seed are required per acre.

The following Mixtures of Grass Seeds are all thoroughly cleaned, and cannot fail to give the greatest satisfaction. There are neither clover nor coarse grasses in the mixtures.

To ensure a Fine Lawn, free from weeds and coarse grasses, it is most important that the soil to be sown should be quite clean, that is, free from the seeds of objectionable plants, and the grass seeds used should consist solely of the fine-leaved dwarf-growing grasses. In sowing Grass Seeds always take advantage of rainy or damp weather, and after sowing, give a slight covering of clean finely-riddled soil; this, followed by rolling, when the soil is sufficiently dry, will ensure a successful vegetation. After this, frequent cutting and constant rolling will be necessary to have a fine smooth lawn.

Barr's "Thames Embankment" Grass Seeds for Parks, a special mixture which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Per lb., 1 3; per 10 lbs., 11 6; per 20 lbs., 21s.; per 56 lbs. and upwards, at the rate of 1/- per lb.

Barr's "Standard" Grass Seeds for Garden Lawns, Golf Links, Cricket Grounds, and Bowling Greens, a special mixture suitable for the above-named purposes, and which is *sure to please* buyers. Per lb., 1 6; per 10 lbs., 13 6; per 20 lbs., 23/-; per 56 lbs. and upwards, per lb., 1 2.

Barr's New Mixture of Dwarf Grasses, for producing an Extra Fine Smooth Lawn, a special mixture of the finest leaved and dwarfest growing grasses, producing an *extra fine velvet turf*. Per lb., 2/-; per 10 lbs., 19/-; per 20 lbs., 37/-; per 56 lbs. and upwards, per lb., 1 9.

Dutch Clover, Finest White, if Clover is desired, it may be added to the Grass Seeds at the rate of 3 to 5 lbs. per acre. Per lb., 1 6.

HOW TO DESTROY WEEDS ON LAWNS.

WATSON'S WEED-DESTROYING LAWN-SAND will kill Daisies, Dandelions, Plantains, &c., on Lawns, Cricket Grounds, &c., and is also a good fertilizer for the grass. Fuller particulars will be sent on application. Sample canisters, 1-, 2 6, and 5 6; per $\frac{1}{4}$ cwt., 9 6; $\frac{1}{2}$ cwt., 18/-; 1 cwt., 34/-.

‘PHYTOBROMA,’

BARR'S NEW PLANT FOOD.

FOR FLOWERS, VEGETABLES, FRUIT, AND LAWNS.

PHYTOBROMA we can confidently recommend to our Customers as a valuable food for all kinds of plants, being rich in those Chemical properties essential to the health and productiveness of vegetable life.

It contains a large percentage of phosphates and potash salts in a form acting directly on the roots of a plant. It is cleanly to handle and without offensive odour.

PHYTOBROMA secures to Vegetable, Fruit, Cereal, and Field Root Crops, a strong healthy growth, and consequently, an increased and superior crop. In the culture of Flowering Plants its use produces a greater profusion of bloom, increased size of flower, and richness of colour.

Exhibitors at Flower Shows will find this valuable Manure.

For the improvement of Grass Lawns, Tennis Courts, Cricket Grounds, PHYTOBROMA can be strongly recommended, its use soon producing a thicker growth and richer colour. *Further particulars on application.* 2 lb. tin, 1/-; 7 lb., 2 6; 14 lb., 4 6; 28 lb., 7 6; 56 lb., 12 6; 1 cwt., 20/-.

Prepaid Orders for 28 lbs. and upwards sent Carriage Paid to any station in Great Britain and any port on the Irish coast.

A Few Practical Hints on Bulb Culture.

PROPER CONDITION OF SOIL.—Only plant bulbs, when the ground is in a nice friable condition, and never when the soil is wet and sticky. Better plant later in good friable soil, than early in wet saturated ground.

PREPARING GROUND FOR BULBS.—After digging or trenching, the ground should be allowed to settle at least ten days before planting. If planted on freshly trenched ground, as the land subsides, the bulbs will be drawn down below their proper depth.

DEPTH TO PLANT.—Many amateurs have a tendency to plant too deeply, and thousands of bulbs are destroyed annually by too deep planting (crocuses especially suffer from this error). The proper guide to go by is the bulb itself, which should be covered with soil once and a half to twice its own depth but not more, measuring the bulb from its base to its shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil, and a crocus bulb measuring one inch in depth with only one and a half to two inches of soil.

PROPER TIME TO PLANT AND BEST POSITION.—Information on this subject is given at the heading of each family. Amateurs frequently fail with many bulbous plants through planting at the wrong season, thinking that because September is the proper time to plant crocuses, all other autumn bulbs should be planted in the same month, whereas such families as Ranunculi, Ixias, Sparaxis, &c. should not be planted before November at the earliest, the best time being generally immediately after Christmas, or as soon as the ground is in good working order after that date; if planted in September they are almost sure to be killed.

MANURE FOR BULBS.—All bulbs object to the ammoniacal properties of manure, consequently hot or fresh stable manure should never be used to dig in the ground for bulbs, but only well decayed stable or cow manure (chicken manure is poison to bulbs, being too full of ammonia). The safest manure for bulbs of all description, out doors, is phosphatic basic slag, price 7/- per cwt., 8d. per 7 lbs.; this should be put in ground with the bulbs at the time of planting at the rate of 1 ton per acre or 7½ oz. per square yard, and after planting, sprinkle on the surface of the ground sulphate of potash at the rate of 2 cwt. per acre or ¾ oz. per square yard, price 2/- per cwt., 1/- per 7 lbs.

Bulbs in pots should have a surface dressing of 'Phytobroma' when showing top growth and again when in bud (see page 2 of cover).

TOP DRESSING.—Where possible, we advise a top dressing to all bulbs through the winter months with some light material such as long straw litter, cut heather, cut furze branches, &c., or cut fern bracken resting on pea sticks (cut fern used by itself lies too wet and is apt to rot the young growths). The advantage of this light covering is that it keeps the surface soil sweet, keeps off heavy autumnal rains, and protects any early top growths.

BARR'S Selected Bulbs & Roots for Early Forcing.

CULTURE FOR EARLY BULB FORCING.

Pot the bulbs 3 to 6, or more according to size, in a 4 or 5-inch pot, barely covering the Bulbs with soil. This should be done during August, September, and October, the pots being placed out of doors on a bed of ashes, and covered over with a few inches of cocoa-nut fibre or ashes. There let them remain till the bulbs are well rooted, and have made a little top growth, when a few pots at a time should be removed to a cold frame and be kept partially shaded for a day or two, after which they should be removed to a moderately warm and moist temperature, a plentiful supply of water being then given to the roots. A successional supply of flowers can thus be maintained from November to February.

BARR'S

Famous 'Covent Garden'

COLLECTIONS of BULBS.

Sent Carriage-paid with Box and Packing free, on receipt of remittance.

(After November 1 we may find it necessary to make slight changes in the Collections.)

(A) BARR'S 'Covent Garden' 21/- COLLECTION of BULBS

For Early Forcing.

Contains 350 Bulbs of fine quality, as follows :

12 Choice Named Hyacinths	Narcissus (Daffodils)	6 Double Tulip Tournesol
12 Early White Roman Hyacinths	3 " Golden Spur	100 Splendid (Named) Crocuses
3 " Blush "	3 " Pallidus praeox	25 Scilla sibirica
3 " Blue "	3 " Telamonius plenue	50 Elwes Giant Snowdrop
6 Double Roman Narcissi	3 " Bicolor Horsfieldii	12 Chionodoxa Luciliae
6 Paper White 'Early Snow-flake' Narcissi	3 " Poeticus ornatus	12 " sardensis
3 Polyanthue Narcissus 'Grand Soleil d'Or'	12 Single Tulip, Early Scarlet, " Duc Van Thol"	12 Allium neapolitanum
3 " Grand Monarque	6 " Chrysolora	1 White Bermuda Lily
25 Sweet-scented Single Jonquils	6 " Cottage Maid	2 Iris reticulata, the beautiful
	6 " Koizerskroon	Violet-scented Iris
		12 Freesia mixed hybrids

BARR'S 'Covent Garden' COLLECTIONS of BULBS

For Early Forcing,

42/-, 63/-, 84/-, and 105/-

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

(B) BARR'S 'Covent Garden' 21/- COLLECTION of BULBS

For the Greenhouse, Sitting Room, &c.

Containing 300 Bulbs of fine quality.

Arranged for those who prefer a few sorts only of easily cultivated Winter and Spring-flowering Bulbs.

20 Choice Named Hyacinths	6 Narcissus Telamonius plenus	12 Chionodoxa Luciliae
6 Early White Roman Hyacinths	6 " Poeticus ornatus	12 " sardensis
3 Polyanthus Narcissus .	6 Single Tulip Chrysolora	25 Elwes Giant Snowdrop

42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

(D) BARR'S 'Woodland' 21/- COLLECTION of BULBS***For Naturalising in Woodlands, Orchards, Wild Gardens, &c.***

Containing 1,006 suitable Bulbs of fine quality.

200 Daffodils, mixed of all kinds	25 Summer Snowflakes	12 Snakeshead Fritillarias
75 Winter Aconites	25 Dogs' Tooth Violets, mixed	6 Crown Imperiale, mixed
75 Star of Bethlehem, white	25 Anemone, Single, mixed	3 Lilium davuricum, mixed
50 Blue Starch Hyacinths	12 " apennina	3 " pyrenaicum, yellow
150 Crocuses, mixed	6 " fulgens	3 " candidum
100 Wood Hyacinths, mixed	50 Milla uniflora	12 Gladiolus Colvillei
100 Elwes Giant Snowdrops, small bulbs	25 Allium Moly, yellow	12 " " The Bride
	25 Lily of the Valley, crowns	12 " byzantinus

BARR'S 12/6 'Woodland' COLLECTION of BULBS,

Containing half the quantity of the Bulbs enumerated in the above 21/- Collection.

BARR'S 'Woodland' COLLECTIONS of BULBS,

42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

A Few Fine Novelties and Specialities *IN BULBS AND TUBEROUS-ROOTED PLANTS.*

	each—s.
ALBUCA Nelsoni , a most beautiful Cape bulb, producing in June handsome spikes of almond-scented flowers, pure white with slight brown stripe (under glass <i>pure white</i>). For pot-culture or south wall, ht. 3 ft.	per doz. 7/6 o 9
ALLIUM Schuberti , a very curious and beautiful new species, having star-like flowers of a pretty rose-lilac colour, radiating from the top of the stem, ht. 1½ to 2 ft. It is hardy, if lightly covered during severe weather in winter	per doz. 10/6 i o
ANEMONE fulgens Leichtlini , very large handsome flowers, fiery scarlet with white centre; plant under a south wall or in any other warm situation.....	2 6
Giant Single 'Glory of the South' , this is a grand Anemone; the flowers are single and very large, with broad rich brilliant scarlet petals and rich blue-black central boss; a flower of great beauty and fine substance	per 100, 10/6 ; per doz. 1/6 ...
New Double 'Victoria Giant' , a double strain of this grand Anemone, colours most brilliant and varied, and flowers very large	per doz. 3/6 o 4
" " " 'La Dame Blanche' , large white flowers, very faintly tinged rose; of great beauty. 1st Class Certificate	per 100, 21/- ; per doz. 3/- o 4
" " " 'Snowball' , very beautiful snowy white curled flowers, resembling in form a white incurved Chrysanthemum. 1st Class Certificate	per 100, 21/- ; per doz. 3/- o 4
" " " 'Vesuvius' , flowers of perfect form and fully double, rich brilliant scarlet, a most striking flower	per 100, 24/- ; per doz. 3/6 o 4
'St. Brigid' , a very lovely strain of Poppy Anemones, flowers very large, mostly semi-double, and of the most brilliant and varied shades of colour, all having a handsome blue-black central boss. Plants graceful in habit, and remarkably free flowering	per 100, 10/6 ; per doz. 1/6 ...
BRODIAEA californica , the largest-flowered of all the Brodias; the individual blooms resembling in shape a large <i>Lxiolirion</i> , of a delicate heliotrope shade of colour, are borne in graceful umbels, ht. 15 in.....	per doz. 6/6 o 8
Howellii lilacina , bearing in early summer clusters of elegant tubular flowers, pale lavender tipped white, very beautiful, ht. 1 ft. 1st Class Certificate R.H.S.	per doz. 7/6 o 8
ixiodes splendens , a very handsome and beautiful variety bearing large umbels of light yellow flowers	per doz. 6/6 o 8
Purdyi , a remarkably handsome new species, having the pretty dwarf habit of <i>B. grandiflora</i> , flowers soft lilac with a handsome violet bar running down centre of each petal, borne in graceful umbels, very free	per doz. 7/6 o 8
CALOCHORTUS—ELDORADO STRAIN , a new race of the lovely <i>Butterfly Tulips</i> (see also page 12), of tall sturdy growth, from 1½ to 2 ft. in ht., and flowers distinct in form and colouring. They vary greatly in shade—from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon. All have a showy centre of brown and yellow prettily speckled, while others have a beautiful golden blotch on each petal. As cut flowers they are invaluable, the buds opening well in water, and for beauty they cannot be excelled; they continue in bloom often for two months, and delight in a warm sunny situation and light sandy soil. (For full Cultural Notes see page 12.) The Royal Horticultural Society granted this strain an Award of Merit, 1896. (For Illustration of <i>Butterfly Tulips</i> see page 13.)	... per 100, 18/- ; per doz. 2/6 ...
Beautiful varieties mixed	per 100, 18/- ; per doz. 2/6 ...
White (Pictus) , flowers large white with red blotch on a golden ground, centre reddish brown, very lovely	per doz. 3/6 o 4
Purple , flowers a rich deep velvety purple	7/6 o 8
Pink to Blood-red , colours remarkably varied and rich	7/6 o 8
CHIONODOXA Luciliae rosea (new), flowers of beautiful soft shades of rose and rose-lilac with white centre	home-grown bulbs i 6
Luciliae alba (new), white flowers of delicate beauty	" " "
DODECATHEON , American Cowslips or Shooting Stars , beautiful new varieties, great improvements on the present known species and varieties, and all very strong growers. Hardy and of easy culture, but delighting in shade and moisture.	i 6
James Cooke , delicate rose-lilac with scarlet-maroon eye, bordered yellow and surrounded by a white halo	1 3
Longfellow , delicate blush, with golden eye, encircled with velvety maroon, and a halo of white margined carmine	2 0
Rosy Gem , delicate pale rose, with yellow eye encircled with brown, and a halo of white bordered carmine	2 0
Snowflake , pure white, with yellow eye encircled with velvety maroon	2 0
Victor Hugo , white tinged blush, with conspicuous velvety maroon eye, bordered golden-yellow	3 0
EREMURUS himalaicus , a most lovely species from the Himalayas, and one of the hardest. It attains a height of 5 to 8 feet, bearing dense heads nearly 2 feet long, of large snowy white flowers, with golden anthers, from May to June. It requires a well-drained soil with a north or north-west aspect, protected from cutting winds in spring	roots of flowering size 7 6

Novelties and Specialities—continued.

each—s. d.

ERYTHRONIUM Johnsoni , one of the most beautiful of the American Dog's Tooth Violets. colour a beautiful bright rose with yellow centre, and golden anthers. Award of Merit R.H.S., 1897. <i>Buyers will be charmed with this lovely plant...</i> per 100, 50/-; per doz. 7/6	0	9
revolutum , 'Pink Beauty' (new). We have much pleasure in introducing this lovely variety. In form the flowers resemble <i>E. Johnsoni</i> , but the colour is a soft delicate pink. We strongly recommend all lovers of hardy flowers to try it...per 100, 63/-; per doz. 8/6	0	10
FRITILLARIA nobilis (new), the most handsome of <i>Fritillarias</i> , flowers very large, of a rich deep blood-red colour, beautifully tessellated inside, ht. 6 inches, <i>flowered at our Nurseries for the first time in England</i>	2	0
pluriflora , true, a remarkably distinct and beautiful species introduced in 1896, of very graceful habit, flowers pale rosy purple, <i>very early</i> . <i>A native of the Sacramento Valley</i> ; it delights in shade and protection from cutting windsper doz. 7/6	0	9
Whittallii (new), flowers beautifully tessellated inside and out with reddish brown on a yellowish ground. 1st Class Certificate R.H.S., May 1896per doz. 4/6	0	5
GALANTHUS (Snowdrop) caucasicus grandis , a handsome Snowdrop, very tall, with large flowers, petals very long, tube white, blotched green at mouth	1	3
olioicus , a fine new species resembling <i>G. Fosteri</i> , but flowering earlier. It is a tall grower with long handsome flowersper doz. 3/6	0	4
Ikariae , a most distinct and beautiful Snowdrop, with broad glossy light green reflexing foliage, flowers snowy white, inner segments heavily tipped bright green, per 100, 15/-; per doz. 2/3	0	3
IRIS persica Vogeliana , a beautiful new Iris, flowers larger than <i>I. persica</i> , S. silvery grey with dark veins, F. deep silvery grey with large claret-coloured blotch	1	0
LACHENALIAS , beautiful new varieties , raised by the Rev. Theodore Marsh, all decided improvements and valuable additions to this lovely family of plants.		
Cawston Gem , yellow, tipped pink, robust growerper doz. 12/-	1	3
Garnet , very early, yellow with deep ruby edge	1	3
Little Beauty , a very beautiful variety	1	3
Rector of Cawston , rich deep yellow, tipped red, dwarf	1	3
Topaz , rich deep yellow, with narrow purple margin	1	3
LILIUM auratum , 'Beauty of Japan,' a splendid new variety of <i>Lilium auratum platyphyllum</i> type, its grand large flowers being very broadly banded, with glowing dark crimson down centre of petals. It is a stately Lily of great beauty, and a fine acquisition... Bolanderi , a beautiful new Lily from Oregon, with dense whorls of foliage and elegant bell-shaped flowers, deep crimson spotted maroon, ht. 1½ ft. 1st Class Certificate	15	0
Harrisii (The Bermuda Easter Lily) , a few special monster bulbs, doz. 21/-; 2/- & Henryi , a most handsome and elegant Lily discovered lately by Dr. Henry in North China; the flowers resemble in form <i>L. speciosum</i> , but are orange-yellow in colour and freely produced on elegant branching heads, a hardy and vigorous grower, ht. 5 to 6 ft.	2	6
Humboldti magnificum , a splendid new variety, bearing large handsome flowers deeper in colour than <i>L. Humboldti</i> , and more heavily spotted; the recurved petals are conspicuously tipped purplish brown, ht. 5 ft. 1st Class Certificate3/6 &	5	6
pardalinum Johnsoni , one of the best of the <i>Pardalinus</i> , from British Columbia, of strong sturdy growth with dark-green foliage and very showy flowers, glowing crimson shading to orange, ht. 5 ft.2/6 &	3	6
Parryi , a very beautiful Californian species, with large bright yellow flowers lightly spotted and of delicate perfume, ht. 3 ft. Awarded 1st Class Certificate R.H.S.	3	6
Roezlii , true, a rare Lily from the Pacific coast, bearing an elegant raceme of brilliant orange-red flowers spotted purple and with reflexed petals, ht. 3 ft.	3	6
rubellum , one of the most beautiful of recently discovered Japanese Lilies. The growth is slender like that of <i>Kramerii</i> , the flowers are of distinct elegant form and a delicate pale rose, with golden anthers, hardy, 1½ ft. <i>This lovely Lily promises to be of easy culture</i> , 2/- & LILY OF THE VALLEY , Fortin's Giant-flowered Strain (see Illustration, page 39), a very beautiful strain with remarkably large handsome bells on long sturdy stalks; a giant compared with the ordinary variety; we specially recommend it for outdoor culture; plant 9 inches apart, and when established its grand flower-spikes will surprise the grower. Strong crowns may be very slowly forced in March..... flowering crowns , per 100, 15/-	3	0
MUSCARI conicum. Heavenly Blue , see page 41. neglectum carneum , a rare starch Hyacinth, bearing spikes covered with beautiful bell-shaped flowers of a pretty rosy flesh shade.....per doz. 10/6	1	0
RANUNCULUS asiaticus superbus , a very pretty strain of large-flowered Ranunculi with double, semi-double, and single flowers of most brilliant varied colours; the petals of many are prettily flanged and cut, rendering them distinct from all other Ranunculi, 1000, 25/-; 100, 3/-
RICHARDIA Pentlandii , the beautiful large Golden Calla or Arum Lily , a noble plant with handsome plain deep green foliage and large rich golden-yellow flowers Plants in pots , according to size, each 10/6, 15/-, 21/-, 30/- & 42	0	0
STERNBERGIA Fischeriana , a handsome Spring-flowering species of 'Lily of the Field'.....per doz. 5/6	0	6
TROPÆOLUM Leiohtlini (new), resembling in habit <i>T. polyphyllum</i> , but flowers much deeper and brighter in colouring, being of a rich brilliant orange-gold, very hardy, free grower and profuse bloomer, charming used as a climber or trailer, for sunny situations	3	6
TULIPA Kaufmanniana , a rare and beautiful Tulip, bearing early in the season large flowers of elegant form and remarkable beauty, petals large, broad and reflexing, creamy white with carmine red on reverse, centre yellow	2	6

CHEAP OFFER
OF
Hardy Bulbs and Plants
FOR EXTENSIVE PLANTING

IN SHRUBBERIES, FLOWER BORDERS, ON ROCKWORK, &c., AND TO NATURALISE
IN WILD GARDENS, WOODLANDS, ALONG CARRIAGE DRIVES, ON BANKS,
IN GRASS, &c.; ALSO TO PLANT FOR CUT FLOWERS.

For full descriptions see body of Catalogue.

MUSCARI CONICUM 'HEAVENLY BLUE,' ESTABLISHED ON A HEDGE BANK
AT OUR LONG DITTON NURSERIES.

Year by year we see the taste increasing for the so-called 'Wild Garden,' or the grouping of hardy subjects in a free and unconventional manner, leaving them to colonise and form themselves into pretty natural groups, such as Nature exhibits to us in her woods and copses, and wherever she has been left to reign undisturbed. This phase of gardening is one which must have a great attraction for the lover of hardy flowers; by it, bare and ugly places may be made beautiful, and a charm added to the landscape. Few sights are more beautiful in Spring than such hardy flowers as Daffodils, Snowdrops, Chionodoxas, Muscaris, Anemones, &c., established in grass. The experiment has been successfully made at Kew Gardens, to the great delight of visitors, and this Spring, large stretches and slopes of grass-land thus planted, presented quite a

'Riviera' picture. At the earliest

dawn of Spring the following flowers will lighten up the landscape with their fresh bright colours: *Winter Aconites*, *Snowdrops*, *Early Scillas*, *Chionodoxas*, *Early Daffodils*, &c., followed by *later-flowering Daffodils*, *Crocuses*, *Muscaris*, *Anemones*, *Star of Bethlehem*, *Cowslips*, *Late Scillas*, *Cottage Tulips*, &c. All the foregoing may be grown in grass-land where the grass is not cut till the meadows are mown. On lawns, which require cutting earlier, such charming little early-flowering subjects as *Snowdrops*, *Chionodoxas*, *Early Dwarf Daffodils*, and *Scillas* may be planted. In places where the grass is not required to be cut, a still wider scope for gardening presents itself, as several of our Summer- and Autumn-flowering Lilies may be introduced, as also other tall and stately flowers.

N.B.—We have marked thus † those flowers which will thrive in shady places, under trees, on shady banks, &c., or may be planted in the open border. The variously coloured *Wood Hyacinths* (Blue Bells) will establish themselves freely under Pine and Fir trees and in shady nooks, where scarcely any other flower will thrive, and seen thus they present a lovely sight. § Indicates those bulbs, &c., which are essentially wood plants, and should only be grown in shady situations.

BARR'S
ALPHABETICAL DESCRIPTIVE LIST
 OF
Bulbs, Tubers, and Plants,
FOR ALL SEASONS AND CLIMATES.

IN the following pages we give descriptions, as far as space permits, of the various Bulbs, &c., with general notes as to their cultural requirements. The illustrations are mostly reproductions, on a greatly reduced scale, of sketches and photographs taken at our **Long Ditton Bulb Nurseries**. Great care is taken in the selecting of our Bulbs, these being drawn from the **best bulb farms only**. High-class Daffodils and Tulips, &c., also many little rare and beautiful bulbous plants, *we are ourselves large growers of*, and are in a position therefore to select for our customers an extra fine quality.

***** Those marked thus * ripen late and are sent out from the middle of October to March. All other bulbs, &c., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, &c., will be executed therefore in two parts.

each—s. d.

*ABOBRA VIRIDIFLORA , an elegant half-hardy perennial <i>scarlet-fruited</i> climber; plant outdoors in Spring and lift the tubers in Autumn, storing them in dry sand in a cool place away from frost	per doz.	5/6	10	6
*ACHIMENES , these make charming pot-plants for the greenhouse, and are very decorative with their brilliantly coloured elegant flowers; pot in rich light soil in Spring and start in bottom heat. 12 varieties, 1 root each, 3/6; 3 roots each, 12 varieties, 8/6.				
ACONITE - WINTER. See Winter Aconite.				
AGAPANTHUS (African Lily) , valuable pot-plants for the greenhouse, and when grown in tubs on terrace walks and lawns few plants give a more noble effect; very effective planted out by streams, lakes, and ponds. During severe winters they should be covered, or in very cold climates be taken indoors until Spring, water being given only sparingly. This plant is a gross feeder, and likes a rich soil and plenty of moisture while in growth.				
umbellatus , handsome umbels of rich blue flowers	per doz.	7/6	0	9
", maximus , same colour as <i>umbellatus</i> , but with larger flowers		1	3	
", albus , handsome umbels of white flowers		1	6	
", Mooreanus , small blue flowers in graceful umbels	per doz.	7/6	0	9
", flore-pleno , a very handsome variety, with fine double blue flowers		2	0	
*ALBUCA canaliculata , a decorative greenhouse Cape bulb, which may also be planted out under a south wall; it produces handsome trusses of very fragrant golden flowers, 1½ ft.		2	6	
ALLIUM , a decorative and showy family of hardy Spring- and Summer-flowering bulbs, valuable alike for borders or rockwork and for naturalising in woods, &c. <i>A. neapolitanum</i> is easily forced, and the cut blooms are extensively used for vases and table bouquets.				
acuminatum , with beautiful soft rose-lilac-coloured flowers in umbels, 1 ft. per doz. 1/6	0	2		
azureum , handsome intense blue flowers, quite hardy, 2 ft.", 2/6	0	3		
cyaneum , pretty deep blue flowers in clusters, ½ ft. established tufts 1	6			
karatavienne , a remarkably handsome plant, with very large broad glaucous-green foliage spreading close to the ground, ½ ft. per doz. 5/6	0	6		
Moly , bright yellow flowers in umbels, very showy, 1 ft. per 100, 3/6; ", 6d.				
neapolitanum , an elegant bouquet flower largely grown for the market; it produces numerous heads of graceful white flowers, ht. 15 inches per 100, 3/6; per doz. 6d.				
Ostrowskianum (<i>syn. oreophyllum</i>), a charming species from Asia Minor, with large heads of beautiful rose-coloured flowers, 2 ft. per 100, 15/-; per doz. 2/3				
pedemontanum (<i>syn. narcissiflorum</i>), rose-purple, drooping bell-shaped flowers in clusters, beautiful and very distinct, ¾ ft.		1	6	
pulchellum , graceful heads of charming bright rosy purple flowers, in July, ¾ ft., per doz. 4/6	0	5		
", flavum , small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering, ¾ ft. per doz. 3/6	0	4		
Rosenbachianum , large purple-rose flowers, 2½ ft.", 5/6	0	6		
triquetrum , white, striped green, graceful drooping umbels, pretty, 1 ft. per 100, 7/6; per doz. 1/3	0	2		

***ALSTRÖMERIA.** These beautiful 'Peruvian Lilies' are very easy to cultivate, and produce in Summer abundance of charming cut flowers, which last long in water. Their showy and attractive flowers render them most valuable border plants. Plant so that the top is four inches below the surface, selecting by preference a situation close to a wall or hedge, and protecting, the first Winter, with leaves or litter. *A. pelegrina* and *A. pulchra* are more tender, and delight in hot dry sunny situations, such as under a south wall; they also make fine plants for a cool greenhouse.

aurantiaca, flowers rich orange, spotted carmine, very showy and valuable for cutting; this plant should be grouped in every herbaceous border as it is quite hardy, 3 ft.

per 100, 12/6; per doz. 1/9

0 2

***ALSTRÖMERIA**—continued.

	each—s. d.
<i>chilensis hybrida, mixed</i> , beautiful shades of rose, crimson, orange, yellow, buff, and blush, with yellow and crimson markings, valuable as cut flowers, per 100, 12/-; per doz. 1/- 0 2	
<i>lutea</i> , bright yellow flowers with carmine spotting, very pretty, 3 ft. " 10/-; 1/- 0 2	
<i>pelegrina alba</i> , white, very chaste and beautiful flowers, grow under a south wall or in frames " 5/- 0 6	
<i>rosea</i> , rose-coloured flowers, beautifully spotted } wall or in frames " 4/- 0 5	
<i>psittacina</i> (The Parrot Flower), bright crimson flowers splashed green and mahogany, 3 ft. per 100, 12/-; per doz. 1/- 0 3	
<i>pulchra</i> (tricolor), white and yellow flowers, striped and blotched crimson, protect in severe weather per doz. 3/- 0 4	

AMARYLLIS (Hippeastrum), Large-flowered choice Greenhouse Varieties.

These are magnificent in the conservatory, and valuable to cut for table bouquets and vases; with management, they may be had in bloom for many months. The unnamed hybrids quoted we specially recommend, as they are from the best collection in Europe, and are sure to please, both as regards variety, beauty of colour, and size of flowers. *The bulbs we offer are of large flowering size, and will bloom the first season.*

CULTURE.—Immediately after potting, place in a moist warm temperature, and plunge the pot to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf-growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat they do well in an ordinary greenhouse or sunny sitting-room window.

Amaryllis, Barr's Choice Unnamed Hybrids, Flowering Bulbs, purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beauty per doz. 25/-; each, 2/-

Barr's Choice Named Large-flowered Greenhouse Amaryllis.

These we can strongly recommend for their large flowers, of excellent form, and rich colours.

12 magnificent exhibition vars. £7 7 0 12 extra fine named varieties	£5 5 0

AMARYLLIS. Various Species.

Belladonna (**The Belladonna Lily**), bearing umbels of beautiful large white flowers flushed and tipped soft rose. If planted in light soil (*the top 6 inches below the surface*) against a south wall it will establish itself and bloom freely every year per doz. 6/- 0 8

***formosissima (Jacobea Lily)**, beautiful large quaintly shaped dark crimson flowers per 100, 30/-; per doz. 4/- 0 5

***formosissima glauca**, differs only from above in the colour being a striking crimson-scarlet per 100, 30/-; per doz. 4/- 0 5

 **The Jacobea Lilies** may be grown in pots and forced, or be planted in the open in April for Summer-flowering.

AMORPHOPHALLUS, curious and ornamental bulbous plants from the tropics, interesting as pot-plants and valuable for sub-tropical bedding. The tubers should be kept dry and away from frost during Winter, and may be planted outdoors March to April, four inches deep, or for indoors potted earlier.

campanulatus, a very curious species, flowers very large, dark red and black, and produced close to the ground 1 6

Rivieri (Umbrella Arum), a very handsome plant, with large palm-like leaves 2 to 3 ft. in diameter, on a white spotted stem; it makes a charming pot-plant for a room

Strong Tubers, per doz. 10/- 1 0

ANEMONE, or WINDFLOWER. (*See also Novelty List, page 4.*)

For brilliancy of colour few flowers can compare with the **Anemone**, which in Spring produces its masses of bloom in endless variety of shades, scarlets, crimsons, roses, blushes, lilacs, blues, purples, and white, all of which for cutting are valuable, lasting long in water. For beds, edgings, and masses, in the borders it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good soil, moderately well drained, suits the Anemone. Plant in succession *A. coronaria* varieties from October to May, the roots four to six inches apart, at a depth of two to three inches, choosing a dry day, and when the ground is in good working condition. *The plantings for Summer and Autumn-flowering should be in a situation where the ground is moist, and in shade from the sun's rays after 10 or 11 a.m., and well sheltered from cutting ground winds.* In districts which suffer badly from Spring frosts, plant in December or January.

A PLANTING OF ANEMONES SHOULD ALWAYS be made both Autumn and Spring. If grown as pot-plants, put three tubers in a four-inch pot, and plunge out of doors for a few weeks, when remove to a shallow cold frame or on top shelf of greenhouse, close to glass, to prevent drawing.

ANEMONES, FOR BEDS AND MASSES, Barr's Double Poppy. (A. coronaria varieties.) The flowers of the **Double Poppy Anemone** resemble a semi-double Hollyhock, and are extremely handsome. When planted from October to December, they flower in succession during the early Spring months, while those planted from January to April flower in succession from April to July.

For Anemones, 'St. Brigid's' and 'Glory of the South,' see Novelty List, page 44.

ANEMONE STELLATA, The Starry Windflower of the Riviera, or Peacock Anemone. These Starry-flowered Single Anemones are remarkable for variety of brilliant colours, elegant flowers, and graceful foliage. A light well-drained soil in a warm sheltered situation suits them best; on rockwork they look charming; they also make good pot-plants, six roots in a pot. Plant September, October, and November.

Choice mixture of beautiful shades of rose, brick-red, scarlet, ruby, &c., valuable for cutting	p. 100	p. doz.	s. d. s. d.

White Gem, very beautiful, flowers clear white with blue centre	5 6

ANEMONE FULGENS, The Beautiful Starry Windflower of the Pyrenees, &c. This, with its rich dazzling scarlet flowers, and light elegant growth, is the most brilliant and graceful of all Winter- and Spring-flowering Anemones. It is invaluable for table bouquets or vases, as it lasts a long time in water. If the roots are planted early in Autumn, flowers may be gathered, weather permitting, from Christmas; its hardiness is beyond all question, so that roots may be safely planted any month from August to May. This brilliant flower should be used largely in wild gardens, orchards, woodlands, on half-shady banks, &c. The plantings made April and May should be in a situation where in Summer the ground is moist, and the sun's rays do not fall on them after 10 or 11 a.m. If grown as pot-plants plunge out of doors for a time.

ANEMONES. Various Beautiful Species. *Anemone apennina*, the blue Mountain Windflower, forms a dense cushion of rich blue, and is one of the loveliest of dwarf Spring flowers. Where Daffodils are naturalised this and *A. blanda* should be freely planted. *A. blanda* resembles *A. apennina* in flower, but blooms a month earlier. The varieties of *Anemone nemorosa* (The Wood Anemone) literally carpet the ground with their charming flowers; being shade-loving plants they should be planted under trees or in shady nooks on rockwork. *A. nemorosa Robinsoniana* is remarkably beautiful. All are exceedingly charming established on rockwork, or as pot-plants.

	each—s. d.	each—s. d.

For other beautiful Anemones, see our *Hardy Plant Catalogue*, free on application.

***ANOMATHECA**

cruenta, a charming bulbous plant, with small bright scarlet, crimson-blotted flowers in July and August; very pretty as an edging out of doors, or on rockwork, and in pots, ¾ ft., *plant in early Spring* per 100, 5/6; per doz. 10/-

grandiflora, large handsome flowers, bright scarlet, blotted crimson, ¾ ft.

***APIOS tuberosa**, a rapid-growing elegant hardy deciduous climber, for arbours, trellises, &c., flowers deliciously scented per doz. 2/6 o 3

ARUM, curious and interesting border plants, more or less handsome. They should be given choice spots on the border or rockwork. As pot-plants they are very ornamental.

Dracunculus and **Italicum** are quite hardy; the other species require Winter protection, such as ashes, leaves, litter, or cocoa fibre, and should be grown by preference in light loamy soil on a sunny border.

cornutum (*syn. Sauromatum guttatum*), red flowers, spotted black, stems curiously marbled, handsome foliage, 1½ ft..... per doz. 2/6

crinitum, flowers reddish brown, and of immense size, stem marbled., 7/6 o 3

Diescoridis spectabile, bearing magnificent blackish-purple flowers, taller and flowering a few weeks later than *A. palestinum* (ht. 3 to 3½ ft. with good culture) per doz. 8/6 o 9

dracunculus, large purple-red and black-blue flowers, marbled stem, very handsome " 3/6 o 4

Eggeri, crimson-purple margined green, with large velvety dark maroon spadix, Spring-flowering per doz. 15/- i 6

italicum, flowers greenish white, followed by spikes of scarlet berries, leaves spotted " 1/6 o 2

palæstinum (*syn. sanctum*), **The Sacred Black Calla from Lebanon**, flowers velvety black inside, olive-coloured outside, sweet-scented, handsome ornamental foliage, Spring-flowering per doz. 5/6 o 6

BABIANA, the flowers range in colour from blue to the richest crimson-magenta, and are set off by a dark green hairy foliage. They have a fine dwarf compact habit, and are of great value for pots, rockeries, or the front of borders. Culture same as for the *Ixia*, see page 32.

Extra choice mixture, of many beautiful colours per 100, 12/6; per doz. 1/9

***BEGONIA**, Barr's Large-flowered Single English Bedding varieties in separate colours, scarlet, crimson, rose, salmon, pink, white, orange, and yellow each colour, per 100, 35/-; per doz. 5/-

Choice Mixed Large-flowered Single varieties for bedding " 24/-; " 3/6

Barr's Handsome Exhibition English Single Begonias for pot-culture, having a stiff erect habit and large round-petalled flowers of fine form and substance, cannot be surpassed. In separate selected colours per doz. 15/-, 21/-, & 30/-

Barr's Handsome Exhibition English Double Begonias for pot-culture, flowers of grand form, equalling Camellias in symmetry, and of brilliant colours,

Best named sorts... per doz. 21/-, 30/-, & 35/-

Barr's Bedding Double Begonias, in six separate colours per doz. 10/6

Barr's Bedding Double Begonias, mixed, in good variety of colour " 7/6

BELLADONNA AND GUERNSEY LILIES, see *Amaryllis*, page 9; and *Nerine*, page 43.

***BESSERA elegans**, a beautiful Mexican bulbous plant with graceful umbels of drooping bell-shaped, bright scarlet flowers; grow in pots for indoors, or plant on rockwork in spring, 1 ft. per doz. 5/6 o 6

BLOOMERIA aurea, beautiful umbels of golden-yellow flowers, striped brown, hardy, 1 ft. per doz. 3/6 o 4

BOBARTIA aurantiaca, a beautiful summer-flowering bulb. See *Homeria*.

BOMAREA, magnificent greenhouse plants; they grow best in a compost of equal parts rough sand, turf, loam, and peat. While in growth, manure water should occasionally be given.

salsilla (*syn. oculata*), a beautiful climbing species, purple spotted, red flowers in clusters, for greenhouse or warm positions outdoors per doz. 2/6 o 3

***BOUSINGAULTIA baselloides**, an elegant climber, valuable for hanging baskets, window boxes, rustic tubs, &c., leaves pale green and fleshy, flowers white and hawthorn scented, hardy on dry rockwork, or in well-drained sunny situations per 100, 15/-; per doz. 2/-

***BRAYOA geminiflora**, a handsome hardy plant, long racemes of beautiful orange-scarlet drooping flowers; charming in pots and flower borders, 1½ ft. per doz. 4/6

BRODIAEA, a very beautiful family of hardy bulbs, well deserving a place in every choice border, or for select nooks on rockwork. June-July flowering.

Bridgesii, a fine distinct species, bearing umbels of pretty purplish-rose flowers with light centre, 1½ ft. per doz. 5/6 o 6

capitata alba, bearing on tall stems umbels of lovely pure white flowers, 2 ft. per doz. 4/6 o 5

coccinea (*Fire-Cracker of California*), a remarkably handsome plant bearing graceful umbels of long tubular blood-red flowers, tipped green, 1½ ft. ... per 100, 21/-; per doz. 3/- o 4

congesta, lilac, flowers in rosettes, valuable as a cut flower, 2 ft., 1/-

grandiflora, charming bright blue flowers, quite hardy, a most valuable dwarf spring flower for edgings, masses, &c., ½ ft. per 100, 5/6; per doz. 10/-

Hendersoni, handsome umbels of chrome-yellow flowers, striped violet o 9

BRODIÆA—continued.

CALLA, or Arum Lily. See Richardia.

CALOCHORTUS, or more popularly known as the **Butterfly** or **Mariposa Tulips**, **Globe Tulips**, and **Star Tulips**. (See Illustration, page 13.) These lovely Californian bulbs, although belonging to the same Natural Order as the Tulips of our gardens, bear little resemblance to them. They flower through June and July, and for delicacy of texture and brilliancy of colour are unsurpassed; they deserve a place in every Hardy Flower border, and for select places in the Rock Garden they are charming.

As cut flowers the Calochorti are of great value, the flowers lasting well and the buds opening easily in water; the varieties in the *Mariposa* or *Butterfly* section are especially suitable to cut, having long stems and being profuse continuous bloomers.

They all make charming pot plants (several bulbs in a pot) for the cool greenhouse or cape pit.

CULTURE OUT-DOORS.—The *Calochorti* are all quite hardy. The 'Mariposa' and 'Star Tulips' require a sunny position and light gritty or sandy soil on slightly raised beds to insure perfect drainage; plant from September to end of November, 2 to 3 inches deep, and 3 inches apart. Cover the beds after planting with straw or cut heather, to keep surface sweet and as a protection in case of early growth; remove the covering in March. A position facing south and sunny spots on the rockery are specially suitable.

When in full growth give occasional soakings of water, but not too frequently. After flowering, ripen off by placing glass over them, or take up when foliage dies down.

The 'Globe Tulips,' being woodland plants, like partial shade and a porous soil composed principally of leaf mould.

Selections of Calochorti , from Sections 1, 2, and 3:

CHINESE SACRED LILY. See *Narcissus*, page 43.

CHIONODOXA LUCILIAE

CHIONODOXA (Glory of the Snow). The Chionodoxa is one of our earliest spring flowers, and its beauty in very early spring is unsurpassed. It should be largely planted in all borders and dotted over all bulb beds. They are perfectly hardy, and once planted come up year after year and never need be disturbed; when thus left the flower spikes increase in size and beauty each year. If grown in pots and jardinettes they may be had in bloom early in January, but should be brought on in a cold frame or cool greenhouse close to the glass. When associated with *Aarcissus minimus*, the effect is charming, as both flower at the same time. *For a fine immediate effect plant the bulbs close together.*

Chionodoxa Lucilie (The Glory of the Snow), unsurpassed for edgings and masses in flower borders and on rockwork: colour deep *Nemophila-blue*, with clear snow-white centre. We were awarded a First-Class Certificate for this lovely flower by the R.H.S.

Home-grown Bulbs	per 1000, 30/-; per 100, 3/6; per doz. 6d.

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a deservedly prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or pure white Crocuses, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass, the Crocuses are extremely effective. For several years past in Hyde Park, Regent's Park, and other of the London Parks, Crocuses, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors. In wild gardens, woodland walks, &c., the Crocus should be associated with the violet, the primrose, and the oxlip.

When planting Crocuses outdoors plant as shallow as possible, barely covering the bulb; many amateurs plant too deeply, which is generally the cause of any failure in their blooming.

BARR'S CHEAP SHOWY CROCUSES for Large Plantings.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, &c., these Crocuses are quoted cheaply by the thousand. For a gorgeous effect in early Spring nothing can equal the **Golden Yellow Crocus**, large masses of which attract the eye at a great distance.

BARR'S CHOICE NAMED LARGE-FLOWERED CROCUSES.**Large Roots for Pot-Culture and Flower Beds, &c.**

The following large-flowered named Crocuses are recommended for planting in groups, edgings, select beds, and in designs. To obtain the finest effect the bulbs should be planted half an inch apart. When grown in pots, plant thickly, and plunge pots in ashes only up to the rims. When removed from under the ashes, place in an airy situation, and give water very freely at the roots. A charming effect is obtained by growing Crocuses in shallow saucers of water (the bulbs touching one another), and this may be accomplished in an ordinary sitting-room.

CYCLAMEN FOR GREENHOUSE (C. persicum).**BARR'S LARGE-FLOWERED DWARF STRAIN FOR GREENHOUSE OR SITTING-ROOM DECORATION.**

These beautiful Cyclamens are a great improvement on the old strain ; the flowers are large, of rich and delicate colours, and stand well above the handsome foliage ; the plants are of dwarf and compact habit.

Plants in Pots, set with bud or in bloom, supplied from September to December—

per doz. 15/-, 21/-, 25/-, and 30/-; each, 1/6, 2/-, 2/6, 3/6, and 5/6, according to size.

Seed of Barr's Prize Strain of Cyclamen persicum for November sowing,

CYCLAMEN. Hardy Species for Rock-Work Out-of-Doors. per pkt. 1/6 and 2/6.

Plants ready to send out at all seasons.

These **Hardy Cyclamen** require perfect drainage, and shelter from the cutting winds of March and April, and the hot rays of the Summer sun ; at the bottom of old walls facing north and on rockwork they are very beautiful ; or nestling in the grass, near the roots and under the shelter of old trees, the effect is most charming. *C. Europeum* is fragrant, and commences flowering in July. *Ibericum* and *Coum* varieties bloom from December to March ; *Repandum* closes the Cyclamen season in April. *Repandum* and *Africanum* should be planted in warm protected situations on rockwork, and covered with cut heather, straw, or a few light boughs, to keep off cutting ground winds till March.

Cyclamen neopolitanum and *græcum* are perfectly hardy, and have throughout Autumn and Spring large and beautifully variegated leaves ; they make beautiful Winter beds, intermixed with *Scillas*, *Chionodoxas*, *Leucojums*, Miniature Daffodils, Snowdrops, *Muscaris*, &c.

FRITILLARIA, an extremely elegant family of hardy plants, bearing graceful drooping bell-
shaped flowers in May. The large-flowered varieties are charming for grouping in borders
and for clumps on rockwork; the smaller flowered dwarf kinds for select nooks on the
rockery. They are all essentially shade-loving plants, and a little sharp sand placed around
the bulbs at time of planting is very beneficial. All make very pretty pot plants (several in a
pot) for greenhouse decoration.

The 'Snakeshead Fritillarias' (F. *meleagris* vars.) have large graceful bell-
shaped chequered flowers; they are of easy culture, and are very effective in groups on
rockwork, flower border, or naturalised in grass; they also make charming pot-plants.

Walujewi (new), inside blood-red, outside silvery grey, large and very beautiful, 1 ft.

Award of Merit R.H.S. 1897 2 6

For three other grand species, see Novelty List, page 5.

GALANTHUS (Snowdrop).

In the early Spring months, there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. In planting, the bulbs should almost touch each other. An effect of surpassing beauty may be obtained with Snowdrops associated with *Scillas sibirica*, or *bifolia*, *Chionodoxa* *Luciliae*, *C. sardensis*, or *C. gigantea*. When practicable such plantings should be permanent, and the surface of the soil top dressed in Summer and sown with annuals, such as *Nemophila*, *Leptosiphon*, &c., or planted with surface rooting bedding plants. The Snowdrop and the Crocus when planted in alternate circles are very effective, and follow each other so closely that no gap is left in the succession.

In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines; they flower while these bulbs are just moving the surface, and when the flowers are over there remains an elegant groundwork of green foliage.

The Snowdrop, nestling in grass, looks charmingly at home, as also on hedge banks, &c. The turf need not be disturbed, but holes about three inches apart and five inches deep should be made with a dibber, dropping in three inches of fresh soil, then three or more bulbs. The Giant Single Snowdrop, *Galanthus Elwesii*, should be extensively used; its flowers are large and valuable for cutting. In its native habitat it is found growing with the *Chionodoxa*, and the effect of the two together is lovely.

Permanent plantings of Snowdrops should be made always in the shade as far as possible.

per doz. 7/6 · each 0 8

GLADIOLI, Early-flowering, for Autumn and Winter Planting.

These beautiful Early-flowering Gladioli are greatly prized as cut flowers from May to July for filling vases, &c., and on this account, as also for the fine effect they produce in the flower garden, they should be largely planted. *G. Colvillei, The Bride*, is exceptionally valuable, and is extensively grown in pots to cut during April, May, and June for Covent Garden Market. All these early Gladioli may be grown in pots for indoor decoration.

CULTURE OUT-DOORS.—Select a sunny situation protected from cutting winds. Trench the ground deeply, working in plenty of rotten manure in the underspit; and plant from end of October to January at a depth of four to five inches. *After planting cover with long straw litter or other light material, which remove in March.* If the summer is dry and the weather hot, an occasional good soaking of water or liquid manure will prove beneficial.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a 5- or 6-inch pot, and plunge in ashes in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried in ashes out of doors, and remain undisturbed till ready to remove indoors.

BARR'S CHOICE NAMED HYACINTHS

FOR CULTURE IN GLASSES, JARDINETS, POTS, AND FOR EXHIBITION.

CULTURE IN POTS.—The best soil to use is a compost of good fibrous loam with a liberal addition of leaf-soil, sharp sand, and well-decayed cow manure. The whole should be well mixed and left to stand some time before being used.

In potting, leave the top of the bulb just exposed, and let the soil be in a nice friable state and not too moist. The pots should then, at once, be placed outdoors on a bed of ashes, and covered with six inches of the same material, or cocoa fibre, and left exposed to all weathers. *When the bulbs have well rooted*, and about an inch of the top growth has been made, they may be removed indoors, first into a subdued light until the blanched foliage has attained its full green colour, and then into the sunniest situation at command in the greenhouse or conservatory. Abundance of air, a moderately moist atmosphere, and plenty of water at the roots is then necessary for early, well-developed flower spikes. *A dry or frosty atmosphere or a draughty situation will cause the flower buds to shrivel. Forcing should only be done gently*, the temperature not exceeding 60 degrees.

If finely developed trusses and rich colours are preferred to very early flowers, the *Hyacinth* should not be forced, but be left outdoors longer to develop, and then removed to a mild temperature like that of a cool greenhouse, a sitting-room window, or frame, always selecting the sunniest and most genial situation.

CULTURE IN GLASSES.—Pure clear water should be used with a piece or two of charcoal in it to keep the water sweet. The base of the bulb should at all times just touch the water. Place the glasses in a cool dark place to encourage root growth. When the glasses are nearly full of roots admit them to the light gradually, and then to the sunniest place at command till the flower spikes are well developed. Avoid a too dry or frosty atmosphere or a draughty situation, as such conditions will often cause the flower buds to shrivel up. Barr's Mixture of Cocoa Fibre and Charcoal is an excellent material for growing Hyacinths in, and is clean and inoffensive for handling (see page 60 for directions).

CULTURE IN JARDINET.—For this purpose Barr's Mixture of Cocoa Fibre and Charcoal is undoubtedly the best material to use. It should be always kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss. Grown in jardinetts, Hyacinths are charming when associated with early Spring-flowering bulbs like *Chionodoxas*, *Scilla sibirica*, *Snowdrops*, *Tulips*, *Crocuses*, *Narcissi*, *Iris reticulata*, &c.

BARR'S NEW 'PRIZE-WINNING' EXHIBITION HYACINTHS.

A very careful selection of a few of the finest Hyacinths for Exhibitors.

We have selected these varieties specially out of many hundreds, as being specially suitable for exhibition on account of their grand spikes of fine form, their large bells and beautiful colours. Several of them will be little known to the public, being new varieties and great advances on existing sorts. *We simply give the colours, as they are all of highest excellence in form and size.* Most of them have been awarded prizes and certificates of merit.

BARR'S

GENERAL COLLECTION OF NAMED HYACINTHS.

BULBS THE FINEST AND PICK OF THIS SEASON'S CROP.

Owing to the cold weather during the early ripening days, Hyacinths have received a slight check in their growth during the past two seasons, and in consequence we do not recommend any hard forcing, and in pots or glasses Hyacinths THIS SEASON should in all cases be grown slowly and steadily, in fact almost cold in order to ensure the usual fine results. If grown in glasses keep them in the dark room a few weeks longer than usual before removing to sitting-room or conservatory.

The varieties of Hyacinths described below, and included in the following selections, we have personally selected during our many visits of inspection to the Finest Hyacinth Farms in Holland, and experience has proved them the most worthy of cultivation.

BARR'S POPULAR SELECTIONS OF NAMED HYACINTHS.

Van Vondel , beautiful soft chrome-yellow, large handsome truss		

BARR'S 'EXTRA SELECTED' HYACINTHS for BEDDING.

The following Hyacinths are of an extra selected quality and far superior to what are commonly sold as 'Bedding Hyacinths' at lower prices. The varieties selected are those having large erect well-formed spikes of uniform height and rich brilliant colours, and only differ from the named **Exhibition Hyacinths** in the bulbs being a shade smaller in size. They may also be used with advantage for filling flower boxes, rustic baskets and vases, &c. As some varieties open a little earlier than others, we have put them into two sections—(1) Those which commence to flower first and about the same time, and (2) those which come to perfection a little later, and bloom about the same time. We trust this arrangement will be of assistance to purchasers in making their selection.

SECTION I.—Varieties coming first to perfection, and which may be bedded together.

We can supply these in separate colours at 19/6 per 100; per doz. 2/9.

**BARR'S BEAUTIFUL 'RAINBOW' MIXTURES OF HYACINTHS,
FOR FILLING BEDS AND PLANTING IN BORDERS, &c.**

Barr's Beautiful "Rainbow" Mixture of Hyacinths. These are grown specially for us on one of the large Hyacinth Farms in Holland, and are unsurpassed for quality. Every Spring brings us numerous letters expressing satisfaction with the grand effect produced by these hyacinths. The colours are evenly blended, including red, scarlet, purple, lavender, porcelain, azure-blue, white, rose, blush, &c., producing a magnificent effect in flower beds and borders. Purchasers cannot fail to be pleased with them

IRIS

Irises may be called 'Orchids' of the flower garden, their blossoms competing in richness and variety of colour with the choicest and the most beautiful Orchids. They should be extensively planted in flower and shrubbery borders, and naturalised; a judicious selection will give a display of bloom from Christmas to August. See our Hardy Plant Catalogue for all kinds of Flag Irises.

BARR'S June-flowering ENGLISH IRIS.

(THE LARGE-FLOWERED BULBOUS IRIS OF THE PYRENEES.)

These magnificent Irises thrive in any ordinary garden soil; when the soil is very heavy, surround the bulbs with sand, and see well to drainage. The earlier the planting, after beginning of September, the greater the success, although the bulbs may be put in as late as December. The varieties contained in our collection we have specially selected as being the finest and most distinct, and they will be found as strikingly beautiful and varied in colour as the most sumptuous Orchids of the hothouse. They flower in June, thus succeeding the Bearded Flag Irises. As cut flowers they take a first place.

Our Annual Exhibits of cut flowers of these grand Irises at the London Summer Shows and at King Street, Covent Garden, attract much attention and elicit great admiration.

BARR'S June-flowering SPANISH IRIS.

(THE ORCHID-LIKE BULBOUS IRIS OF SPAIN.)

(See Illustration on page 14.)

The Spanish Irises flower a fortnight before the English, and differ from them considerably, the colours of the flowers being showier and more varied. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare orchids, with which they can well compete in grace and beauty. For vases and bouquets the cut flowers are greatly prized, as they last long when cut, and the buds open well in water. For filling flower beds and massing in borders these elegant Irises are of the greatest value. They will also bear very gentle forcing in pots. The varieties contained in our collection are the *finest* and *most distinct in cultivation*. The cultural treatment is the same as for the English Iris, while they will thrive either in an open or partially shaded situation.

Our Annual Exhibits of cut blooms of these beautiful Irises form a great feature of attraction.

IRIS, Various Beautiful Bulbous and Tuberous-Rooted Species.

These Iris Species are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species will be more enjoyed if planted on rockwork, where the flowers could be a little protected from heavy rains. *Alata*, *Reticulata* var. *Histrion* and *Histrionoides*, *Variata*, and *Uncinularia* (*Stylosa*) vars., are charming winter-flowering species, followed in February by *I. reticulata*, with its lovely violet-scented blossoms, the sweet-scented *I. persica*, the beautiful and lately introduced species *I. Rosenbachiana*, *Bakeriana*, and *Danfordiae*. Next in succession come the interesting *Caucasica*, *Orchioides*, the curious Snakeshead Iris *tuberosa*, and the new species *I. Sindjarenensis* and *assyriaca*. These are followed closely by *Susiana*, *Iberica*, &c., with their

large handsome beautifully-netted flowers ; along with these, *I. Atrofusca*, *Atropurpurea*, *Bismarckiana*, *Gatesii*, *Lorteti*, *Lupina*, and *Helena*, surpass in beauty and interest any written description that can be given of them. The charming dwarf Iris *flavissima Bloudovii*, the pretty Peacock Iris (*I. pavonia*), and the beautiful Iris *cristata* flower in May, and are followed in June by the *Irides juncea*, *Boissieri*, *Iusitanica*, and *tingitana*.

Culture of the Oncocyclus and Regelia Irises marked † in the following list. Plant the roots in November (the tops not more than two inches below the surface) in a light rich well drained soil, and cover with three or four inches of wheat straw or, better still, marsh reeds, or cut heather, which remove in March. Immediately these Irises have done flowering place over the plants a light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain till October. The object desired is to thoroughly ripen the roots, and prevent their starting into growth before Spring. The covering in Winter is to keep off heavy rains, and discourage a premature growth. Or the roots may be lifted soon after they have done flowering, and stored on a dry sunny shelf or in perfectly dry sand till end of October or early November, when replant. *The great beauty of these Irises, especially when seen in established masses, will fully repay the special treatment they require.*

A beautiful Coloured Plate of Oncocyclus Irises, *Gatesii*, *Lorteti*, and *Lupina*, 6d. Another Coloured Plate of Irises, *Atrofusca*, *Bismarckiana*, *Atropurpurea*, and *Helena* (Marie), 6d.

Alata (Scorpion Iris) , pale blue of similar shape to <i>I. reticulata</i> , winter-flowering, $\frac{1}{2}$ ft.	per doz. 3/6 0 4
„ alba , a most lovely variety, flowers white, shaded pale pearly blue to snow-white, $\frac{1}{2}$ ft.	for sunny sheltered positions. 1 6
„ Leichtlini , flowers beautiful large deep blue, $\frac{1}{2}$ ft. 3 6
Assyriaca (new), a beautiful species, with large white flowers, resembling in form <i>I. Siindjarense</i> 2 6
† Atrofusca , a handsome Iris, S. large claret-brown, veined black, F. brown-black, 3 ft.	1 0
† Atropurpurea , beautiful velvety coppery maroon, with black sheen, 1 ft.	per doz. 5/6 0 6
Bakeriana , a lovely species, similar in form to <i>I. reticulata</i> , S. sky-blue, F. white, blotched and spotted dark violet, sweet-scented, flowers before the <i>Iris reticulata</i> varieties (In bloom at our Nurseries, out of doors, 1st February, 1898), $\frac{1}{2}$ ft.	1 3
† Bismarckiana (syn. <i>Sari nazarena</i>), new, flowers large and beautiful, S. sky-blue, veined purple, F. veined reddish brown-purple on a straw-coloured ground, $\frac{3}{4}$ ft., of easy cultivation	per doz. 5/6 0 6
Boissieri , S. and F. rich purple, blotch golden-yellow, June-flowering, 9 in.	10/6 1 0
Caucasicæ , primrose-coloured flowers, with silver-margined foliage, $\frac{1}{2}$ ft.	7/6 0 8
Cristata , a real gem, flowers amethyst-blue, striped orange and gracefully fringed, in May ; charming for sunny sheltered banks, rockwork, &c., where it can be moderately dry in winter, 3 in.	per doz. 2/6 0 3
Danfordiæ , a lovely dwarf species, flowers bright golden-yellow, spotted brown, flowering in February, and delighting in dry nooks on rockwork, 3 in.	1 0
Fimbriata , beautiful sky-blue flowers in winter. This lovely Iris is exquisitely beautiful in the conservatory, but is only hardy outdoors in hot sunny sheltered positions.....	0 9
† Flavissima Bloudovii , a pretty species with attractive soft yellow flowers in May, 9 to 12 in.	1 3
† Gatesii , a hardy robust species of the <i>Susianæ</i> type, but with larger flowers, of a beautiful satiny creamy white, tinged rose, delicately veined and minutely spotted silvery grey, June-flowering, ht. $2\frac{1}{2}$ ft. We were awarded for this beautiful Iris a Certificate of Merit by the Royal Botanic Society	per doz. 18/- 1 9
Grant Duffi , a new species from Palestine, with sulphur-yellow flowers and blue-green foliage ; may be treated like the Tall Flag Irises	per doz. 7/6 0 8
† Helena (syn. <i>I. Mariæ</i>), a lovely Iris with large handsome flowers, S. bright lilac, F. purple, veined black and with velvety black blotch, 1st Class Certificate Royal Botanic Society.....	per doz. 7/6 0 8
† Iberica , a dwarf species of great beauty, with large handsome flowers, S. satiny white, veined dark purple, F. rich brown-purple, with black blotch, ht. 6 in.	per doz. 5/6 0 6
Juncea , S. and F. brilliant golden-yellow, one of the most beautiful and showy of bulbous Irises ; to cut for vases invaluable, ht. 15 in. It prefers a rather dry and warm light soil	per doz. 2/6 0 3
„ pallida (new), very distinct and beautiful, flowers large and of a lovely soft canary-yellow shade, ht. 15 in. Award of Merit R.H.S. 1898.	per doz. 10/6 1 0
† Leichtlini , large handsome flowers, bronzy brown, shading to lilac, ht. $1\frac{1}{2}$ ft.	2 6
† Lorteti , a great beauty, resembling <i>I. Gatesii</i> , but with rose-coloured markings, May-flowering, ht. 1 ft.	1 0
† Lupina (The Wolf's Fur Iris), a remarkably striking new species, with curious greenish yellow flowers, veined brownish red, and with a heavy beard, resembling a wolf's fur, ht. $\frac{1}{2}$ ft.	per doz. 7/6 0 8

IRIS, Various Beautiful Bulbous and Tuberous-Rooted Species—continued.

Lusitanica (true), S. yellow, F. rich yellow, with orange blotch, handsome, ht. $1\frac{1}{2}$ ft. each—*s. d.*
per doz. 5/6 o 6

Orchioides. This species resembles *I. caucasica*, but has larger flowers of a bright golden-yellow colour, produced in the axils of the leaves, April-flowering, ht. 1 ft. 4 6

Pavonia major (Vieusseuxia, or Moraea), the Peacock Iris, flowers pure white, petals blotched clear celestial blue, a gem for pots or select places out of doors, ht. 1 ft.
per 100, 6/6; per doz. 1/- ...

Persica, white suffused pale blue, the petals blotched purple and gold, very fragrant, ht. $\frac{3}{4}$ ft.
This Iris delights in a warm, light, dry soil per 100, 8/6; per doz. 1/3 o 2

Reticulata, very beautiful, brilliant deep violet, blotched golden-yellow, strongly violet-scented, $\frac{3}{4}$ ft. Figured in *The Garden*, 1881...p. 100, 40/-;

p. doz. 5/6 & 7/6; 6d. & o 8

“ **var. Histrionis,** a charming variety from Palestine, flowers bright blue, blotched golden-yellow, earlier than *I. reticulata*, $\frac{3}{4}$ ft. p. doz. 6/6 o 7

“ **var. Histroides,** flowers beautiful azure, earlier and larger than *I. reticulata*, $\frac{3}{4}$ ft. *First Class Certificate R.H.S.*...p. doz. 6/6 o 7

“ **major,** a very handsome large form, with broader falls and standards than the type 2 6

“ **Krelagei,** claret-purple, blotched golden-yellow, violet-scented, $\frac{3}{4}$ ft. per doz. 4/6 o 5

Rosenbachiana, beautiful sweet-scented flowers, generally white and rosy violet, but variable, $\frac{3}{4}$ ft. *First Class Certificate R.H.S., 1889* 3 6

i o

Sindjarensis, a charming new species from Mesopotamia, like *I. caucasica* in growth; flowers white and azure-blue, prettily crested, March-flowering, 1 ft.

1 0

Sisyrinchium, an interesting little May-flowering species, with small soft lavender flowers, the falls blotched white, ht. $\frac{1}{2}$ ft. Requires a warm sunny situation.....per doz. 2/6 o 3

Stylosa. See *Unguicularis* (the correct name).

Susiana, a remarkably handsome species with immense flowers, bluish, tinted brown, and covered with a network of dark lines, May-flowering, ht. 1 ft. ...per 100, 50/-; per doz. 7/6 o 8

Tingitana, a lovely bulbous Iris from Tangiers, thriving in a warm sunny situation, such as the foot of a south wall. The flowers vary in the Standards from dark to light blue. Falls lilac and white with golden blotch, May- to June-flowering, ht. 2 ft....per 100, 40/-; per doz. 5/6 o 6

(*Beautiful Coloured Plate of Iris Tingitana, price 6d.*)

Tuberosa (Snakeshead Iris), flowers rich velvety violet-black and green, ht. $\frac{3}{4}$ ft.
per 100, 10/6; per doz. 1/6 o 2

Unguicularis (syn. Stylosa), S. and F. beautiful light blue, ht. 1 ft. If grown in a warm dry situation will yield abundance of charming flowers throughout winter...per doz. 5/6 o 6

“ **alba,** a most lovely Iris, flowers ivory-white, ht. 1 ft. 1 6

“ **speciosa,** flowers rich deep blue, netted white, ht. 1 ft. 1 6

Vartani, a pretty little species found near Nazareth, flowers azure-blue, in Nov. or Dec. ht. $\frac{1}{2}$ ft. o 8

For Beautiful Flag Irises, Tall Bearded, Dwarf, and Japanese, &c.,

see our Plant Catalogue.

ISMENE CALATHINUM. See Hymenocallis.

IXIA.—The African Corn Lily, a graceful slender growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays present a picture of gorgeous beauty.

CULTURE IN POTS.—From October to January plant five or six bulbs in a four- or five-inch pot, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, and at first give sparingly. When the plants are in growth, the lights should be left off except during wet or frosty weather. Early in February, or when the plants have made sufficient growth, remove them to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUTDOORS.—Plant from November to January, at a depth of three inches, and the bulbs two inches apart, on raised beds, in a prepared light loamy soil, in a sunny situation, protected if possible from cold east and northerly winds. When planting cover the bulbs with coarse sand. A covering of straw, litter, heather, or other light material will protect the early top growth from frosty winds, but it should be removed in March. The gorgeous beauty of these flowers amply rewards the little extra care they require to ensure success.

IRIS RETICULATA.

each s. d.

JONQUILS, SWEET-SCENTED.

The Double and Single Jonquils are prized for their graceful sweet-scented flowers in or out of doors. For indoor decoration three to six bulbs should be grown in a 4- or 5-inch pot, and cultivated the same as the Hyacinth in all respects, whether for early flowering or succession. If planted outdoors and treated the same as Daffodils, a long succession of these deliciously scented flowers for indoor decoration may be maintained.

☞ For New Lachenalias of great beauty, see Novelty List, page 5.

LEUCOJUM (Snowflake), Spring, Summer, and Autumn-Flowering.

Leucojum vernum, the Spring Snowflake, is one of our earliest and most beautiful Spring flowers, the blossoms of which, resembling a large Snowdrop, are handsome in outline and elegant in bouquets. *L. aestivum* and *Hernandezii*, the Summer Snowflakes, flower in April and May, and are remarkable for their elegant blossoms. *L. autumnale* is a charming white, pink-tipped Fairy-like Snowflake, blooming in August and September; it is best planted in pure sand. *L. trichophyllum* resembles *Autumnale* in its graceful flowers, but blooms in Spring; plant in pure sand, and give cold frame treatment, keeping it well moist while in growth. Mr. William Robinson, in his paper at the Conference on Hardy Flowers, remarked:—“The early-flowering Leucojum (*L. vernum*) is a more precious flower for gathering than the Snowdrop, and the late-flowering Leucojum is graceful and handsome in grass.” They all delight in shady situations.

	each—s. d.
autumnale (Acis) , white and pink flowers in Autumn, graceful in pots and on rockwork, &c., $\frac{1}{2}$ ft.; grow in pure sand in shade; quite hardy	per 100, 15/-; per doz. 2/3 o 3

BARR'S BEAUTIFUL HARDY LILIES.

FOR PLANTING IN BEDS, BORDERS, AND FOR GREENHOUSE DECORATION.

THE LILY, for variety of colour, chasteness, and beauty of form, is matchless amongst hardy plants. The flowering commences in May, and a continuous unbroken succession of bloom, from species of different countries, is maintained till the frosts of Autumn destroy the last unexpanded flower buds.

CULTURE OUT-OF-DOORS.—In choosing a situation for planting, *perfect drainage*, natural or artificial, should be the first consideration. The borders of Rhododendron and Azalea beds, and such-like positions, are generally suitable for Lily culture, as the necessary compost for the particular species can easily be given, and the shelter from the surrounding branches is beneficial in protecting the plants from cold winds in Spring, and also affording a partial shelter from the sun's rays in Summer. Sheltered spots in mixed herbaceous and shrubbery borders will also do. In preparing the ground, loosen the soil to a depth of several feet, and add fresh loam, coarse sand, and sweet decomposed leaf soil, or good peat, care being taken that the soils are as free as possible from insect life, and the compost sufficiently friable. Plant the bulbs 4 to 6 inches deep (except where otherwise stated), and they may then remain undisturbed for many years. The bog or swamp-loving Lilies *Superbum*, and the varieties of *Canadense* and *Pardalinum*, require a moist but sweet soil and rather shady situation; they are admirably adapted for growing amongst Rhododendrons and Azaleas in moist situations, and for the sides of brooks, ponds, rivulets, &c.

All Lilies are shade-loving plants; their favourite aspect is a north-westerly one.

CULTURE INDOORS.—THE LILY being a free rooter requires plenty of pot-room, therefore use in most cases a 6- or 8-inch pot for one bulb, according to its size; a compost of fibrous loam and sweet decomposed leaf soil, with plenty of coarse sand or a mixture of good peat, loam and sand suits the Lily best. See that the drainage is perfect and the inside of the pot clean, to start with. Pot firmly, barely covering the top of the bulb, and leaving room to add more soil when the surface roots appear. Select a situation out of doors, protected from the afternoon sun, and stand the pots on a bed of ashes raised above the general level to avoid stagnant moisture, and make firm to prevent the entrance of worms; then cover with 6 inches of cocoa-nut fibre or old leaf soil to keep off excessive rains. When top growth begins to show above the covering, remove the pots to a cold frame, pit, or greenhouse, and start giving water sparingly; a little clear weak liquid manure given twice a week when the flower-buds are well advanced will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the Lily may be started in a gentle heat as soon as potted, but as soon as top growth shows itself the plant must be kept as near the glass as possible to prevent it from being drawn. *Superbum* and the varieties of *Canadense* and *Pardalinum* prefer for soil a moist sandy peat, but will also thrive in any good fairly moist but sweet soil.

To those desiring further information regarding Lilies, we recommend Dr. Wallace's
‘Notes on Lilies’ (price 5/- by post).

***Auratum** (**The White Golden-rayed Crimson-spotted Hill Lily of Japan**). This is indeed the Queen of Lilies, and should have a place in every garden and greenhouse. It is of simplest culture and perfectly hardy.

Those who have beds of Rhododendrons should plant this grand Lily freely amongst them for a succession of flowers. Growing amongst Paeonies, and along the margins of evergreens, clumps of *L. auratum*, 6 to 12 bulbs in a clump planted 3 to 6 inches apart, produce a grand effect. As isolated subjects on large lawns, groups of *Lilium auratum* look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the midday sun. *We are expecting our first consignment of this beautiful Lily to arrive in November from Japan, and we are booking orders for delivery immediately on arrival, at the following extremely moderate prices.*

Splendid Large Bulbs, producing an abundance of flowers, 12 for 10/-, 25 for 20/-, 50 for 38/-, 100 for 70/-
Good-sized Bulbs, producing numerous flowers
 12 for 7/6, 25 for 14/-, 50 for 26/-, 100 for 50/-
Smaller Bulbs, but of good flowering size
 12 for 5/6, 25 for 10/-, 50 for 19/-, 100 for 36/-
A few Special Monster Bulbs, 1/6 each.

*LILY OF THE VALLEY, for Forcing, and making Plantations out-of-doors.

The clumps of Lily of the Valley quoted have been specially prepared, and cannot fail to give abundance of flowers. In potting, the crowns should be a little below the rim of the pot, and covered with cocoa fibre, which should be removed when the crowns show through; *tight* potting is of great importance, and care should be taken, in the first watering, that the moisture penetrates to the *centre of the clump*. The Berlin Crowns are extensively used for forcing by the growers for Covent Garden Market; of these, 15 to 20 may be planted in a 5-inch pot. For Lily of the Valley beds, also for massing in north borders, and to naturalise in woods, copses, &c., the selected Dutch Crowns are the best.

CULTURE.—A moist atmosphere, with a temperature of 80 to 85 degrees, and abundance of water, is necessary to success in forcing Lily of the Valley; to encourage simultaneously the development of flower and foliage, place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, when remove to a less shady situation. If they are grown in a dry atmosphere, or get an insufficient supply of water at the roots, the crowns, technically speaking, go 'blind.'

MUSK HYACINTH. See *Muscaria moschatum*.

NARCISSI, BUNCH-FLOWERED, OR POLYANTHUS NARCISSI.

ALL VERY SWEET-SCENTED.

The **Polyanthus Narcissi** produce large heads of sweet-scented flowers, and are specially adapted for Winter and Spring decoration in pots and jardineets. The effect is greatly enhanced when three bulbs are grown together in a 6 or 7-inch pot. The culture is the same as that of the Hyacinth. For flower beds and mixed borders, the **Polyanthus Narcissi** are great favourites, and produce a beautiful effect. Plant in October or November, but at the approach of winter give a light covering of long litter or other material to keep off severe frosts; remove the covering in March.

Where flowers are in demand in November, December, and early in January, the **Paper White** 'Early Snowflake' and **Double Roman Narcissi** are of great value for forcing with the Roman Hyacinths (see Culture, page 1).

THE SACRED, OR GOOD LUCK LILY OF CHINA AND JAPAN.

Called by the Chinese, 'Joss Flower,' or 'Flower of the Gods,' and 'Water Fairy Flower.'

This is a species of Polyanthus Narcissus we annually import from Northern China, and is prized for the abundance of its flowers and marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant ; they are mostly single, but a few doubles are sometimes found amongst them. Each bulb produces several flower spikes, bearing many flowers. In China and Japan the bulbs are grown in the living rooms in fancy bowls filled simply with pebbles and water, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of 'Good Luck.' The bulb in this country can be grown as successfully as in China, and it is most interesting to watch its rapid growth, which is somewhere about 20 inches in forty days ; place in a sunny window by day and on a table near the fireplace by night, as frost destroys the flower buds. The natural atmosphere of a warm greenhouse suits this flower well, and we can strongly recommend it to FORCE FOR CHRISTMAS DECORATION. *Fuller particulars of culture sent with the bulbs.* Orders now booked for immediate delivery on arrival, which we expect to be the end of September.

variegatum , with prettily variegated foliage	42/-, " 5/6 0 6

Several other species can also be supplied.

PUSCHKINIA, a first-class dwarf hardy April-flowering bulb, which should be represented in the permanent flower borders of every garden; it is charming on rockwork, and is also a lovely indoor pot-plant (6 bulbs in a pot).

libanotica compacta, white, shaded and striped blue, 6 in. ...per 100, 7/6; per doz. 1/3 0 2

RANUNCULUS, **Turco-Persian**, **Turban** and **Persian**.

Nothing produces a brighter or more gorgeous effect in May and June than beds of Ranunculus, the flowers are all good for cutting, and the culture is very simple. They will grow in any ordinary flower border enriched with manure.

CULTURE.—Plant from October to February, 3 or 4 inches apart, selecting a dry day; press the tubers firmly into the soil, *claws downwards*, and cover them with sand, then with soil, keeping the crown of the tuber two inches under the surface. After planting, cover the ground with *long straw, cut heather, or other light material*, which remove in March; this protects the young growths from cutting winds. In April and May, during dry weather, water the beds freely; a plentiful crop of fine flowers will be the result. If grown as pot-plants put three tubers in a 4-inch pot, and plunge out of doors for a time.

RANUNCULUS, Barr's Giant Turco-Persian for Bedding.

This new race of Ranunculus is remarkable for a vigorous growth and profuse flowering.

The blooms are large and very handsome, in great diversity of colour. When massed in flower beds and borders, these grand Ranunculus produce a glorious effect. For cutting they are most valuable, and flowers may be gathered from the same bed several times a week, during the flowering period, without impairing the display.

Barr's Large Orange-Scarlet , for massing in flower beds and borders.....	per 100 3 6

ROSES for Autumn Planting. See page 59.

SANGUINARIA canadensis major (Bloodroot) , the white flowers in Spring borne above the Coltsfoot-like leaves, which fold around the flowers towards evening; a charming plant for the flower border or rock garden; plant in any ordinary garden soil in shady situation; perfectly hardy, ½ ft.	per 100, 8/6; per doz. 1/3	0 2
--	----------------------------	-----

SCHIZOSTYLLIS

coccinea , a valuable hardy Cape plant, producing in Autumn an abundance of Gladiolus-like spikes, covered with showy rich scarlet flowers, prized for cutting; it delights in a sheltered situation amongst trees and shrubs. <i>Established masses, if lifted in Autumn and potted, flower freely under glass during the Winter months</i> , 1½ ft., per 100, 7/6; per doz. 1/3.....	...
---	-----

SCILLAS.—Early-flowering. The effect in early Spring can hardly be over-estimated of the intense brilliant blue of <i>Scilla sibirica</i> , and the beautiful ultramarine-blue of <i>Scilla bifolia</i> , contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus. As edgings these two early-flowering Scillas are most valuable. Grown in pots or jardiniets, alone, or with other bulbs, they form a pleasing variety amongst indoor plants. In flower beds and masses the blossoms are so abundantly produced as to carpet the ground. <i>Bifolia</i> is the first in bloom and is closely followed by <i>Sibirica</i> . All suitable for naturalisation and permanent flower borders.

SCILLAS (Wood Hyacinths).—**May-flowering**, the **Wood Hyacinth** is one of the most decorative of May-flowering bulbs. Our native species (*Scilla nutans*) abounds in most parts of the country, and many suppose it to be the 'Culver keys' referred to by Izaak Walton. The fine Spanish varieties (*S. campanulata*) have erect flower spikes and larger and handsomer flowers than our native plants, which have arching flower spikes. All the **Wood Hyacinths** are very effective in flower and shrubbery borders, and most valuable for wild gardens and woodlands, where they should be largely naturalised; they seed freely and quickly establish themselves. They also make charming pot-plants, and may be forced into bloom by March. The white varieties are greatly in demand to cut for table bouquets and vases. They should also be planted in groups in all shady flower borders and bare shady places, and odd corners which often have a desert-like appearance in the flower garden might well be made gay and useful with these charming **Wood Hyacinths**. **Wood Hyacinths** will thrive under Fir and Pine trees where few other plants will grow.

SPIRÆA (The Meadow Sweet), for Forcing or Planting out.

The large graceful featherly pure white fragrant flowers of *Spiraea japonica* and the new varieties, *compacta multiflora* and *Astilboides*, are most valuable for furnishing vases, while the plants are amongst the most decorative for the conservatory and room. In forcing, a moist atmosphere and abundance of water at the roots is necessary. *Spiraea palmata* has featherly clusters of lovely rosy crimson blossoms, which when cut are greatly prized for vases and bouquets. *Spiraea japonica* fol. *aureo-reticulatis* is attractive and ornamental, and forces as easily as *S. japonica*. In shady or moist borders out of doors, the *Spiræas* are all very decorative plants.

***TIGRIDIA PAVONIA** (Tiger-spotted Flowers).

Few flowers are more gorgeously coloured or so beautiful. The bulbs are supplied from December to May; for pot-culture, pot up as soon as received and plunge in a cold frame, withholding water till the foliage appears, then giving sparingly at first. Those bulbs intended for outdoors should be stored in dry soil or sand, away from frost, till March, and then planted in sunny positions in the flower border. Beds of Tigridias make a gorgous picture during July, August, and September, and should be made a special feature of in all gardens. (*Beautiful Coloured Plate of T. alba*, price 6d.)

BARR'S FAMOUS TULIPS.

AWARDED MANY GOLD, SILVER, AND OTHER MEDALS AND PRIZES AT THE LONDON SPRING FLOWER SHOWS.

(See Illustration, page 40, and on back cover.)

Tulips are extremely hardy, and of easy culture, flowering freely in either sunny or shady situations, and developing their handsome showy flowers even in a confined town garden. By a judicious selection of Single, Double, and May-flowering Tulips, a most brilliant display of colours may be maintained in the garden from early April to end of May. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the Tulips *Scilla sibirica*, *Chionodoxas*, *Snowdrops*, and *Crocuses*; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip. Our large breadths of Tulips at the Long Ditton Nurseries in Spring create much comment and elicit the greatest admiration from all who see them. (See Illustration on Back Cover.)

BARR'S EARLY SINGLE TULIPS.

AWARDED FIRST PRIZE AT THE ROYAL BOTANIC SOCIETY'S SPRING EXHIBITION, LONDON, 1898.

Those alone who have massed the different varieties of *Single Tulips* (*planting the bulbs 4 inches apart*) can form an idea of their great beauty and the rich diversity there is in shade and colour, and the grand effect they produce grouped in flower beds or borders. The *Single Tulip* is extensively grown for indoor decoration (three or five bulbs in a pot) and cultivated in the same way as the *Ilyacinth* for early flowering and succession.

The varieties of the little early *Due Van Thol* Tulips (with exception of the *scarlet-edged yellow variety*, which flowers first) bloom together, and are of the same height, which renders them valuable for beds and borders, where a very early Spring display is required, also for early forcing with the Roman *Hyacinth*, &c.

Hints as to the arrangement of Early Tulips in beds, &c. A difficulty is often experienced by Amateurs in knowing what kind of Tulips to select to bed together, seeing that they are not all the same height, and that some are earlier in flower than others. For the assistance, therefore, of purchasers we have taken special observations at our Nurseries as to the heights and the order in which the *Early Single* and *Double Tulips* flower.

The Heights we give in inches, and the order of flowering is indicated by (1), (2), (3), (4), or (5) after the name. It will be noticed that the *Double Tulips* generally are a little later-flowering than the *Singles*. The difference in time of flowering between each number is not great, so that (1) and (2) may be bedded together, also (2) and (3), and so on. The varieties of *Due Van Thol* are not numbered, as they flower before any of the others.

Arrangement of Colours in Bedding.—The following varieties if bedded together produce charming effects: *Princess Marianne*, *Ophir d'or* and *Wouwerman*; *Pottbakker Scarlet*, *Pottbakker White* and *Chrysolora*; *Prince of Austria*, *President Lincoln* and *Chrysolora*; *Rose Griseline* and *Princess Marianne*; *Pottbakker Yellow* and *Thomas Moore*; *Chrysolora* and *Dusart*; *Princess Ida* and *Rosamundi*; *Duchesse de Parma* and *Fabiola*; *Rosamundi* and *Rose Superbe*; *Couleur Cardinal* makes a grand show bedded by itself, but *Snowdrift* goes well with it; *Keizerskroon* makes a fine bed with *Queen Victoria* as an outside border.

BARR'S DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, &c., also as edgings to beds of Roses and Rhododendrons and to shrubberies. Planted in groups of five or more, they are very attractive. *Plant the bulbs four to six inches apart.*

Time of Flowering.—The numbers in brackets after the name indicate the order of flowering, and will assist amateurs in making their selections for bedding, thus:—(1) corresponds in time of flowering with (1) of the **Single Tulips**; (2) corresponds with (2) of the **Single Tulips**, and so on. The heights, as registered at our Nurseries, are given in inches. By a judicious selection of Double and Single Tulips, a display of brilliant colours may be maintained in the garden for a long period.

Double Tulips should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth.

BARR'S MAY-FLOWERING SINGLE 'COTTAGE' TULIPS.

SHOWY AND BEAUTIFUL FORMS OF *TULIPA GESNERIANA*, AND OTHER SPECIES.

(See Illustration, page 40.)

The name **Cottage Tulips** we have given to the following varieties on account of many of them being found occasionally in very old cottage gardens throughout England, Scotland, and Ireland, where they have been in some cases growing for over fifty years. They are all very beautiful, and on account of their great hardiness are specially adapted for permanent borders, where they should be freely planted in large clumps and masses. They may also be naturalised in grass, wild gardens, &c., where in the early part of May they present a gorgeous appearance. Those who have visited Kew Gardens in Spring will have seen these Tulips planted freely in grass, and also used largely in filling large flower beds on the lawns.

For cutting they are greatly prized, as the stems are long and a free graceful effect can be readily obtained by their use.

In most cases we give the heights as registered at our Long Ditton Nurseries.

In time of flowering, *Elegans* and *Picotee* open first, followed by *Fulgens*, *Golden Beauty*, *Billietiana*, *Golden Crown*, *Gesneriana*, *Macrosila*, *Goldflake*, *Buenaventura*, &c., and the gorgeous **Parrot Tulips** and grand **Darwin Tulips**.

1 3... ...

PARROT, or DRAGON TULIPS, with Laciniated Petals (May-flowering).

These Parrot, or Dragon Tulips, have large characteristic blossoms with curiously laciniated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets the drooping flowers look like orchids. In height they average about 15 inches.

The following are all selected extra strong bulbs, superior to what are usually sold, and may reasonably be expected to bloom, but as there is an unaccountable uncertainty in the flowering of Parrot Tulips, when used for filling beds plant closer together than in the case of other tulips, say 2 to 3 inches apart.

12 bulbs each of the 6 Parrot Tulips described below, 10s. 6d.; 6 each, 5s. 6d.

BARR'S GRAND DARWIN TULIPS (May-flowering).

As grown at their Long Ditton Nurseries and exhibited at the London May Flower Shows, where their grand stately flowers elicit the admiration of all. (See Illustration, page 40.)

For flower beds and borders we confidently recommend the following Darwin Tulips for their stately bearing and rich colours. They have been specially selected as being distinct, showy, and beautiful, so that buyers need have no hesitation in choosing the colours they require as they are all good. The cut flowers form an elegant decoration for vases, and last a long time in water.

We have given the heights in inches, as registered at our Nurseries this last Spring.

RARE AND BEAUTIFUL SPECIES OF TULIPS.

Many of the following **Tulip Species** are rare and little known as yet. They are full of beauty and interest, and will be appreciated by all lovers of hardy bulbous plants. Those species marked † are perfect gems for choice corners in the rock garden, where their lovely flowers will delight the eyes of all who see them. **Greigii** is a grand species with immense gorgeous flowers and large bold spotted foliage; it should be grown in full sun, where the bulbs can get a good roasting in Summer. **Persica** is of great value for edgings and for filling small beds. They are all remarkably distinct from one another in habit and flower.

BARR'S BEAUTIFUL 'GOLD MEDAL' ENGLISH TULIPS. MAY-FLOWERING.

Awarded Three Gold Medals by the Royal National Tulip Society,
1896, 1897, and 1898.

These Beautiful English Tulips we can confidently recommend to amateurs for select places in the garden, and for massing in flower beds and borders. They form a valuable succession to the Early Tulips, while for symmetry of form and beauty of marking they far surpass them.

Our Long Ditton Collection of English Tulips is the largest one in existence and well worth a visit in May, when the flowers may be seen in all their beauty.

To those who wish to know all about the English Tulip, we recommend 'The English Tulip,' a little pamphlet containing the lectures delivered on this flower at the Great Tulip Conference of the Royal National Tulip Society, held at Royal Botanic Society's Gardens, May 12th, 1897—namely, 'The History and the Properties of the Florist Tulip,' by J. W. BENTLEY; 'Seed and Seedlings of the Florist Tulip,' by the Rev. F. D. HORNER; 'The Cultivation of the Florist Tulip,' by C. W. NEEDHAM. Price 1/6.

A short Extract from the WESTMINSTER GAZETTE, May 11th, 1897.

THE FEAST OF THE TULIP.

After an interval of fifty years, a great TULIP SHOW and CONFERENCE is to be held to-morrow and Thursday in the Royal Botanic Gardens, Regent's Park. This is only one sign of a revival of interest in the flower which has as romantic a history as any plant all the world over. Another sign of a mild repetition of the Tulip craze of three centuries ago is the fact that Tulip feasts, dances, and dinners are quite the fashion, and that at last week's Drawing Room, Tulips were among the most popular flowers, both in their natural state, in bouquets, as dress ornaments, and in fanciful designs woven into the magnificent broacades of the Court trains.

* * * * *

Just now the worship of the Tulip in this country is becoming general. That this should be so among Londoners and in Suburbia is probably due to a wonderful object-lesson which Messrs. Barr & Sons, the firm of bulb-growers whose name is honourably known among florists and flower-lovers all the world over, are giving at present at their LONG DITTON NURSERIES. The surroundings of London, miles further out than pretty Surbiton and Long Ditton, are the happy wheeling ground of armies of cyclists. They, and those who go up and down by the South-Western trains, have marvellous tales to tell.

Among the green fields where the grass is rich and high and starred with golden buttercups, among the hedges bursting into sweet white May-bloom, under the avenues of old elms and planes and oaks, there are spread out under the blue sky great stretches of living Oriental carpets. The designs, the colours, the look of richness and depth, are all there; but did ever master weaver or dyer work in shades so luminously beautiful as these? The sun, which otherwise sucks the colour out of a carpet, flushes these acres of crimson and purple and gold with colour notes, dreamt of as something unattainable in art. And day by day, as Spring unfolds her royal robes, these Tulip gardens grow into still greater beauty, and when 10,000 blossoms, their blooming-time being over, softly drop their petals, 10,000 others have arisen to continue the charm and spell of the scene.

A short Extract from the DAILY NEWS, May 14th, 1897.

TULIP SHOW AT THE ROYAL BOTANIC GARDENS.—. . . The great feature of the exhibition, however, was the fine collection of Tulips, running nearly the whole length of the corridor, shown by MESSRS. BARR & SONS, of Covent Garden. This at once obtained the GOLD MEDAL of the National Tulip Society, and the SILVER MEDAL of the Royal Botanic Society. Here were to be seen some of the finest Tulips grown this season. One section was devoted to ENGLISH TULIPS raised in years past by famous growers, and differing from all Dutch Tulips in having more perfect form and colour. They were certainly flowers that delighted fanciers or specialists. Another section was composed of DARWIN TULIPS, which have never been known to break into 'flamed' or 'feathered' varieties. In a third section were the PARROT TULIPS, while a fourth included the COTTAGE TULIPS, mostly of the old English garden variety. These and other blooms made up a collection which, for variety and perfection, is seldom seen.

A SPECIAL PRIZE FOR ENGLISH TULIPS, 1899

Offered by us to be competed for at the

ROYAL BOTANIC SOCIETY'S SHOW, MAY 17th, 1899.

A BEAUTIFUL SILVER CUP

Specially designed by H. G. MOON.

Particulars of Competition can be had on application.

CULTURE.—Any good loamy garden soil suits the 'English Tulip.' The bulbs should be planted three inches deep and four inches apart, from the end of October to early in November, choosing a day when the ground is in nice friable condition; avoid planting when the ground is wet.

HINTS TO EXHIBITORS AND TULIP AMATEURS.—As the English Tulip often suffers much from hail and wind during Spring it is a good plan to erect over the bed a skeleton framework on which a covering of calico or white canvas is fastened in February or March, leaving the sides open until the buds show colour, when the covering may be brought down over the sides too. By this means hail and rain and very hot drying sun are kept off and the flowers open in all their purity, and it prolongs the period of flowering by some weeks. Most lovers of the English Tulip adopt some plan similar to the above, and the beauty of these lovely flowers is quite fascinating enough to repay the trouble of giving them this extra attention.

A still easier means of protection is to hoop the bed over and cover with calico, or to use garden lights, but in all cases care must be taken that the plants do not get drawn.

BARR'S ENGLISH MAY-FLOWERING TULIPS.

Bizarres, Byblœmen, and Roses.

Barr's Choice Mixture of Beautiful English May-flowering Tulips, in great variety, comprising Bizarres, Byblœmens, and Roses. When massed in quantity in beds and borders these beautiful Tulips present a brilliant picture, resembling a richly coloured Persian carpet.....per 1000, 95/-; per 100, 10/6; per dozen. i 6

Byblœmen Rectified Tulip 'Lord Denman,' a grand variety for bedding and massing, large bold flowers, beautifully marked puce-purple on a clear white ground, very effective, handsome and free-flowering.....per 100, 10/6; per dozen. i 6

Explanation of the terms 'Breeder' and 'Rectified.'

'Rectified' Tulips are those in which the original self-colour has changed, or, as it is termed by Tulip Amateurs, broken into a flamed or feathered variegation.

'Breeder' Tulips are those with self-colours which have not yet changed from the original seedling stage, or, as Tulip Amateurs term it, broken into a variegation, but at any time they may become *Rectified*.

'Extra Selected' are specially selected flowers of superior excellence in their markings.

Those varieties offered by the dozen make attractive beds, and are exceedingly effective when grouped and massed in the permanent Hardy Herbaceous Plant border.

BIZARRES, RECTIFIED OR VARIEGATED.

OLD DUTCH FLORISTS' TULIPS.**Bizarres, Byblœmens, and Roses, all Rectified.**

These Dutch Florists' Tulips are wanting in the required points of excellence of form and exquisite markings which give the value to 'English Amateur' Tulips, nevertheless they are valuable for general decorative purposes and are sure to please, for the showy effect they produce in beds and borders.

Beautiful Mixture of Dutch Florists', Bizarres, Byblœmens, and Roses
per 1000, 45/-; per 100, 5/6; per doz. 10/-

VALLOTA purpurea (The Scarborough Lily), a most valuable Autumn-flowering plant, its handsome trusses of brilliant scarlet flowers being greatly valued for filling vases.	each—s.	d.
We recommend it to be planted out of doors in May, and when in bud potted up for conservatory decoration. Established in pots...per doz. 15/-, 21/-, & 30/-; each, 1/6, 2/6, 3	each—s.	6
VELTHEIMIA viridiflora , a very handsome characteristic plant for cool greenhouse, with foliage of a glaucous green and elegantly undulated, and heads of Lachenalia-like flowers, colour, rose and green	2	6

WATSONIA, very ornamental and showy bulbous plants, requiring same cultural treatment as the Gladiolus.

angusta O'Brienii (<i>syn. Ardernei</i>), a lovely plant with snowy white flowers...per doz. 21/-	2	0
coccinea , bearing in Summer handsome spikes of bloom of a gorgeous vermilion colour, on a reddish-brown stem.....	per doz.	2/6
rosea , beautiful rose-coloured flowers. 2 ft.	per doz.	5/6

WINTER ACONITE, its golden blossoms early in Spring are very beautiful, resting on emerald-green cushions of leaves, and very effective when associated with Snowdrops, Early Scillas, Chionodoxas, Anemone fulgens, Anemone apennina, &c. Under trees and in moist situations, where few other plants will thrive, the Winter Aconite luxuriates and densely clothes the ground with its bright green foliage long after the flowers have disappeared. It is a good useful plant to naturalise in grass, &c.

good flowering roots	per 1000, 15/-; per 100, 1/9
extra strong roots	,, 21/-; ,, 2/6

WOOD HYACINTHS. See *Scilla*, page 46.

ZEPHYRANTHES (*syn. Amaryllis*). These Swamp Lilies are a beautiful family of bulbous plants requiring greenhouse culture, or they may be grown in a sunny well-drained situation against a south wall. Charming pot-plants, several bulbs in a pot. Early summer-flowering, except *Candida*, which produces its charming white flowers in Autumn.

Soils, Loam, Peat, Leaf Soil, Silver Sand, and Prepared Potting Soil, per bushel, 2/6.

Cocoa Fibre, superior quality, 1/- per bushel ; 4 bushels for 3/6.

Barr's Prepared Charcoal and Cocoa Fibre, for growing Bulbs in Jardinets, Glasses, &c. Fill the Hyacinth glasses with the preparation, and then add water till no more can be absorbed. In the glass place the bulb so as to rest the base on the preparation, then tie it down with brown paper as you would a jam-pot, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed ; care must be taken that the material in the glass is kept wet. The same remark applies to bulbs grown in vases ; they must be kept in place till they have rooted. 3/6 per bushel ; 1/- per peck.

Jadoo Fibre, the new substitute for earth. It is cleanly to use, is very light, and for growing plants and bulbs (of all kinds) in hanging baskets, vases, jardinets, &c., it is said to be unsurpassed. Full particulars and testimonials on application. Price per peck, 1/- ; per bushel, 3/6 ; per 3 bushels, 8/-

GISHURSTINE.

Unrivalled as a Dubbing on the Soles and Uppers of Boots and Shoes, for keeping the feet dry and warm. Tin Boxes, 6d. and 1/- ; by post 9d. and 1/3 ; specially prepared for hot climates, 9d. and 1/6 per tin.

A FULLER LIST OF GARDEN REQUISITES ON APPLICATION.

Special Notices.

Orders.

We shall esteem it a favour if our Customers will kindly use the Order Sheet that accompanies this Catalogue, and be particular to fill in the full postal and rail address; as sometimes Orders reach us without either name or address, and it is impossible to trace the senders.

Free Carriage of Bulbs.

All prepaid Orders for Bulbs, over 5s. in value, will be sent **Carriage Paid**. Orders not prepaid, if over 10s. in value, carriage may be deducted at settlement of account.

Prepaid Orders.

Besides sending **Prepaid Orders** 'Carriage Paid,' we allow 1s. in the £, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order.

Cash Discount, 5%.

1s. in the £ discount may be deducted from all accounts when paid within 14 days from date of invoice.

Terms of Credit.

Our books are made up at Christmas and Midsummer, when all accounts are due nett.

Remittances.

Money Orders and Postal Orders to be made payable at Covent Garden Post Office; these and all Cheques should be crossed 'London and County Bank.' Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.

Boxes, Bags, &c. are charged at cost price, but these may be deducted from our account if returned **Carriage Paid** within a fortnight. *Returned empties should have the sender's name on the address label for identification, and a notification should be sent by post, stating date of despatch and name of Railway Company.*

Catalogues.

Our **Seed Guide** is published in January, **Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting** in January, **Hardy Plant Catalogue** in February, **Daffodil** and **General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Nurseries, Long Ditton.

Our Nurseries are situated near to **Surbiton Station** (London and South-Western Railway). Visitors are invited during March and April to see our magnificent Collection of Daffodils in flower; in April and May, Tulips, &c.; and during Summer and Autumn to see our Collection of Hardy Perennials and Alpines, and many rare and beautiful Bulbous Plants. *Cab fare from Surbiton Station to Pound Farm entrance of Nursery is 1s.; to main entrance, which is within a hundred yards of Pound Farm entrance, 2s. Cabs are always to be had at Surbiton Station.*

See Prize Notice on back cover of Daffodil Catalogue.

A Fine Silver Tulip Cup. See notice on page 55.

We shall esteem it a favour if our Customers, when ordering goods to be sent to Ireland, will kindly state the route by which they prefer them being sent.

We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring either Head or Under-Gardeners.

Notices to Our Foreign and Colonial Correspondents.

Prepayment necessary.

Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an 'order to pay,' on a London Bank, or Agent;* the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

India.—Seeds and Bulbs can be despatched to all postal towns in India, by **Parcel Post**, at the rate of 1 lb. for 1s., and after the first lb. 8d. per lb. up to 11 lbs., or by '**Eastern Express**,' at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.

Australia and New Zealand, per '**Eastern Express**,' at 6d. per lb. (minimum 2s.), or per **Parcel Post** at 6d. per lb. (1s. being charged for the first lb.). We recommend the **Parcel Post** to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

In Shipping Bulbs and Plants to India, Australia, New Zealand, America, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in successfully preparing and shipping Seeds, Bulbs, and Plants to India and the Colonies extends over a long period.

Photographs taken at Barr's Bulb Fields, Long Ditton, Surrey.

A FIELD OF NARCISSUS BARRII CONSPICUOUS AT BARR'S LONG DITTON NURSERIES.

(See Daffodil Catalogue, page 17.)

A STRETCH OF EARLY SINGLE TULIPS AT BARR'S LONG DITTON NURSERIES.

BARR & SONS, 12 & 13 King Street, Covent Garden, London.

1898.

ORDER FORM FOR BARR'S BULB & DAFFODIL CATALOGUES.

Telegraphic Address:—
BAER, COVENT GARDEN, LONDON.

Free Carriage of Bulbs.

All Prepaid Orders for Bulbs over 5s. in value will be sent Carriage Paid. Orders not prepaid, if over 10s. In value, carriage may be deducted at settlement of account.

PARCEL POST.—The Parcel Post offers great facilities in forwarding small packages, especially to families residing outside the radius of the Railway delivery. We shall avail ourselves of this mode of transit, when cheapest, and the articles ordered weigh under eleven pounds, and admit of being packed for safe transmission by 'Parcel Post.' Heavy packages we shall send by Rail.

Please fill in the full postal and rail address, as sometimes orders reach us without either name or address, and it is im- possible to trace the senders.	To the Account of _____
